

2.1P: In Person Check-in 1 – Answer Sheet

1. Briefly describe your prior experience with programming.
 - I have completed Technical Software Development last semester using C++, I have messed around with python in my own time before last semester to learn some basic skills off YouTube.
2. Based on what you have seen so far, what do you think will be most challenging about this unit?
 - understanding concepts and trying to relate them to real world use. I need to see real systems implemented and break it down to get a good understanding of how they are implemented.
3. What can you do to prepare yourself for that challenge (resources you can use, approach to studying etc.)?
 - Youtube
 - Online resources
4. Is there anything you think the teaching staff should know to best help you this semester?
 - Please use examples from the real world. Help me understand how these concepts are applied in actual software systems.
